Experience

ENKO Control Systems

Backend Developer Intern

İzmir

06/2025 - 07/2025

- Developed a desktop application for data tracking using Electron.js and Node.js technologies.
- Created an automatic update system within the application and optimized version management.
- Contributed to the development of the backend infrastructure for real-time data control and tracking processes.
- Took an active role in team coordination, testing, and debugging stages throughout project processes.

Nexsol Technology

Full Stack Developer Intern

İzmir

07/2025 - 01/2026

- Developed a mobile application focused on TV series and movie tracking using Flutter technology.
- Developed the mobile application's API infrastructure with ASP.NET Core and managed data and user operations.
- Contributed to CRM system development processes by working on customer and data management modules.

SCA Social

Project Management Intern

Istanbul

02/2026 - 03/2026

- Developed Gantt Chart and project planning systems to support process tracking and organizational management.
- Improved myself in Excel, data analysis, and reporting while contributing to the organization of project outputs.
- Contributed to projects with interdisciplinary support by receiving training in management, artificial intelligence, and law.

Activities

Gameathon 4.0

Served as a presenter at a 24-hour game development competition attended by high school students.

2024
